

*Education for Today.
Research for Tomorrow.*

The Will Rogers Institute is committed to helping hospitals save the lives of premature infants, who are in desperate need of pulmonary care. Our mission is to help as many hospitals as possible purchase equipment needed for pulmonary critical care and fund life saving critical care pulmonary programs, serving the premature infant population.

If approved as a grantee, the WRI will provide you with a grant that is restricted for the purchase of neonatal ventilator equipment or funding for a specific neonatal pulmonary related program. The grant cannot be used towards a fundraising campaign, unless the campaign is restricted to the neonatal intensive care unit.

DUE DATE FOR APPLICATION: DECEMBER 1, 2010

“Just today, one of the nurses remarked to me that the Omnibed has meant a lot to her patients and their families. She told me that ‘...because of the microenvironment created in the Omnibed, the neonates have fewer infections and better tolerated feedings.’ The Will Rogers Institute has been a strong and committed partner in Sinai’s mission to improve the health of the individuals and the communities we serve.”

— Matthew Cohen, Manager, Corporate and Foundation Relations, Sinai Health System

- Does your NICU interact or partner with any other facilities providing NICU services in your surrounding area?
If yes, please explain.

- What is the total dollar amount awarded to your institution's NICU in the past 12 months?

- If yes, how were those dollars allocated?

- Please explain how this donation will impact the neonatal intensive care unit.
